

Just the Facts

THE WYNN HOSPITAL

Each week, "Just the Facts" provides information about a key aspect of The Wynn Hospital being built by Mohawk Valley Health System (MVHS). It is designed to keep our medical staff, employees and volunteers updated and to share with family, friends and neighbors so we keep our community informed about how we're transforming healthcare in our region.

TOPIC FOR TUESDAY, MARCH 15, 2022:

How are the platforms I see being used around the outside of The Wynn Hospital held in place?

Roof davit systems support equipment suspended from a building's roof or edge. When maintenance activities require the use of suspended scaffolds, davit systems are an effective solution and provide the ability to reach over parapets or exterior walls.

The Wynn Hospital has davits surrounding the top of the roof. Each will be used to mount a motorized platform for window washing or other façade operations. The platform contains two primary components: a base and an arm. Just this morning our team utilized the roof davit system to apply caulk around the window areas.
