

# Just the Facts

WYNN HOSPITAL

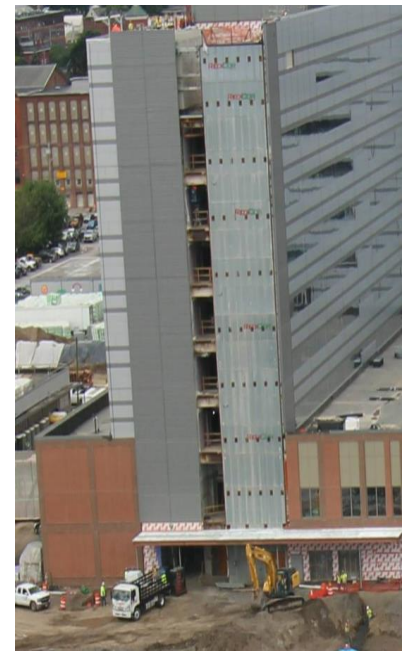

Each week, "Just the Facts" provides information about a key aspect of the Wynn Hospital being built by Mohawk Valley Health System (MVHS). It is designed to keep our medical staff, employees and volunteers updated and to share with family, friends and neighbors so we keep our community informed about how we're transforming healthcare in our region.

## TOPIC FOR TUESDAY, JULY 26, 2022:

### *Has the last hoist on the east side of the building been removed?*

Yes. The Wynn Hospital Project hit another milestone this month with the removal of the last hoist on the outside of the building. Hoists are used to lift workers, materials and equipment for the hospital to the appropriate levels. Now that there are elevators running inside the building and most of the large materials and equipment have already been placed in the building, we were able to remove the last hoist on the east side.

In the first week of August, the subcontractor, Eastern, will be re-mobilized to erect the final panels on the east side of the bed tower. Upon completion, the exterior skin will be 99 percent enclosed with exception of the cladding panels by the connecting bridge (which should be completed in September) and then a couple of leave outs for delivery purposes.
