Prediabetes

Did you know...?

- Prediabetes means your blood sugar levels are too high.
- Prediabetes increases your risk of getting Type 2 diabetes.
- One in three adults has prediabetes and 80 percent of them don't know it.
- Prediabetes can be reversed!
- Type 2 diabetes can be prevented!

What can you do?

- Making healthy changes can help prevent Type 2 Diabetes.
- As a Medicaid member, you have access to the National Diabetes Prevention Program (NDPP).
- NDPP is a program recognized by the Centers for Disease Control and Prevention (CDC) that helps people improve their diet and increase exercise to prevent Type 2 diabetes.
- More information can be found at the CDC website: <https://www.cdc.gov/diabetes/prevention/index.html>

Type 2 Diabetes

Did you know...?

- Type 2 diabetes means the insulin in your body does not work the way it should to keep your blood sugar levels normal.
 - In New York State, around 1.6 million people, or 10.5 percent of adults, have diabetes.
 - Diabetes increases the risk for long-term health problems like heart disease, kidney disease, and amputations.

What can you do?

- With Medicaid member, you can get Diabetes Self-Management Education (DSME) services to help you manage your diabetes.
- You can get DSME services from licensed and trained professionals, in person or by telehealth, one-on-one or in a group.

 Monitor your blood sugar.
  Maintain a healthy weight.
  Eat a healthy diet.
  Exercise daily.

DSME Can Help!

Whether you just found out you have Type 2 Diabetes or have had it for a long time, Medicaid pays for DSME services to help you live your life to the fullest.

 Keep routine health care visits.
  Take your medicine.
  Manage stress.
