

# Just the Facts

WYNN HOSPITAL

Each week, "Just the Facts" provides information about a key aspect of the Wynn Hospital being built by Mohawk Valley Health System (MVHS). It is designed to keep our medical staff, employees and volunteers updated and to share with family, friends and neighbors so we keep our community informed about how we're transforming healthcare in our region.

## TOPIC FOR TUESDAY, APRIL 4, 2023:

### *Team Stations*

The patient tower is designed as an open-core decentralized nursing concept. This design promotes both patient- and staff-centric care by having a designated team station dedicated to each "POD" of four patient rooms. This concept allows for quicker and easier access to patients, and fewer steps for caregivers by having both the station and supply alcoves in close proximity.

Each team station has four (4) work stations: two (2) sitting and two (2) standing height, as well as a printer for those work stations. The team station is custom designed and fabricated for the Wynn Hospital, and is constructed as a furniture system with integrated power and data. The rounded standing-height counter allows for smoother passage of staff, equipment and patients around the team station, and all surfaces will be a cleanable surface appropriate for a hospital setting.
